LATENT FEATURE

TIMELESS TRADITION, MODERN INNOVATION

For centuries, Britannia has represented Britain. In 2021, this iconic symbol leads the way, redefining security in the bullion market with four groundbreaking features that combine to create the most visually secure coin in the world.

The new Britannia design has micro-text featuring the wording ‘DECUS ET TUTAMEN’, which translates as ‘AN ORNAMENT AND A SAFEGUARD’, describing the features that both decorate and protect the coin. A new latent feature switches between a trident and a padlock based on the viewer’s perspective, emphasising Britannia’s maritime strength and the coin’s secure nature. Details like the Union flag on Britannia’s shield have been specially highlighted with tincture lines, and the background has a surface animation that reflects the flow of waves as the coin is moved.

KEY FEATURES

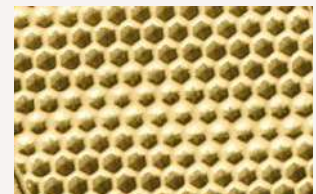

MICRO-TEXT

LATENT FEATURE

TINCTURE LINES

SURFACE ANIMATION

These features are available on the one ounce, half-ounce, quarter-ounce and tenth-ounce fine gold editions of the coin and the one ounce fine silver edition.

INVEST IN A TIMELESS ICON

This award-winning Britannia design was created by Philip Nathan and was first struck in 1987. In one hand, Britannia holds an olive branch which symbolises peace. In the other, she holds a trident as a reminder of the nation’s power and a nod to Britannia’s naval connections. With her Corinthian helmet and Union flag shield by her side, Britannia’s strength is apparent to all who see her.
