

## Britannia

2021 ONE OUNCE  
GOLD BULLION COIN

The 2021 Britannia Gold Bullion One Ounce Coin redefines security in the bullion market. Created by the team behind the United Kingdom's 12-sided £1 coin (dubbed 'the world's most secure coin'), Britannia has evolved once more to spearhead the best security technology available and lead the way as the most visually secure coin in the world. Philip Nathan's award-winning Britannia design from 1987 depicts an enduring symbol of a nation, boldly standing beside a shield that bears the Union flag, a symbol of Britain's strength, and holding an olive branch representing peace. Philip Nathan's Britannia is as beautiful as ever, struck in 999.9 fine gold and enhanced with four new features. In the lower left-hand of the design, below Britannia's flowing gown, is a trident to represent her naval history. As the viewer changes their perspective this trident becomes a padlock, emphasising the coin's secure nature. Surface animation reflects the movement of waves, and fine details like the Union flag on Britannia's shield have been carefully highlighted in the coin's bullion finish. These added security features both decorate and protect the coin, just as the micro-text that borders the design states – 'DECUS ET TUTAMEN', which translates as 'AN ORNAMENT AND A SAFEGUARD'.

These features are also available on the half-ounce, quarter-ounce and tenth-ounce fine gold editions of the coin and on the one ounce fine silver edition.

### KEY FEATURES

- Four advanced features take visual security to the next level
- A latent image changes from a padlock to Britannia's famous trident
- Surface animation brings the background of waves to life
- The micro-text provides both decoration and protection – 'an ornament and a safeguard'
- Britannia's shield bears the Union flag accented with tincture lines

## Britannia

2021 HALF-OUNCE  
GOLD BULLION COIN

Britannia has represented Britain, and the country's evolution, since Roman times. In 2021, Britannia leads the way, redefining security in the bullion market with four groundbreaking features. This new vision of Philip Nathan's Britannia, created in 1987, was created by the team behind 'the world's most secure coin', the United Kingdom £1 coin. Surface animation provides a background for Britannia, reflecting the flow of waves as the coin is moved. Between this and the banding of the coin you will find micro-text with the wording 'DECUS ET TUTAMEN', which translates as 'AN ORNAMENT AND A SAFEGUARD', which describes the features that both decorate and protect the coin. A latent feature in the lower-hand segment of the coin switches between a trident and a padlock based on the viewer's perspective – emphasising her maritime strength and the coin's secure nature. Finally, details like the Union flag on Britannia's shield have been specially highlighted with tincture lines. These new design elements combine to create not only a stunning Britannia design, struck in half an ounce of 999.9 fine gold, but also the most visually secure coin in the world.

These features are also available on the one ounce, quarter-ounce and tenth-ounce fine gold editions of the coin and on the one ounce fine silver edition.

### KEY FEATURES

- Four advanced features take visual security to the next level
- A latent image changes from a padlock to Britannia's famous trident
- Surface animation brings the background of sparkling waves to life
- The micro-text provides both decoration and protection – 'an ornament and a safeguard'
- Britannia's shield bears the Union flag accented with tincture lines

## Britannia

2021 QUARTER-OUNCE  
GOLD BULLION COIN

Britannia is one of the oldest enduring symbols of Britain, evolving from Roman times to today to reflect a nation that changes with the times and the values it embraces. This bullion Britannia coin for 2021 blends a classic icon with innovation, to redefine security in the bullion market. Philip Nathan's award-winning portrayal of Britannia is enhanced with groundbreaking features, making it the most visually secure coin in the world. Britannia is as strong as she is beautiful, and the new features both decorate and protect the coin, just as the micro-text that borders the design states – 'DECUS ET TUTAMEN', which translates as 'AN ORNAMENT AND A SAFEGUARD'. In the lower left-hand of the design, below Britannia's flowing gown, is a trident to represent her naval history. As the viewer changes their perspective this trident becomes a padlock, emphasising the coin's secure nature. Surface animation replaces a standard background, reflecting the movement of waves, and fine details like the Union flag on Britannia's shield have been highlighted with tincture lines.

These features are also available on the one ounce, half-ounce and tenth-ounce fine gold editions of the coin and on the one ounce fine silver edition.

### KEY FEATURES

- Four advanced features take visual security to the next level

## Britannia

2021 TENTH-OUNCE  
GOLD BULLION COIN

The Royal Mint is famous for its ability to blend the finest craftsmanship with innovative technology, and in 2021, our Britannia bullion coin showcases this combination to redefine security in the bullion market. Philip Nathan's depiction of Britannia is as strong and beautiful as ever, his design now enhanced and protected just as the micro-text that borders the design states – 'DECUS ET TUTAMEN', which translates as 'AN ORNAMENT AND A SAFEGUARD'. Surface animation provides a background to Britannia, reflecting the flow of waves as the coin is moved. A latent feature in the lower segment of the coin switches between a trident and a padlock based on the viewer's perspective, emphasising Britannia's maritime strength and the coin's secure nature. Finally, details like the Union flag on Britannia's shield have been highlighted by tincture lines, making this the most visually secure coin in the world.

These features are also available on the one ounce, half-ounce and quarter-ounce fine gold editions of the coin and on the one ounce fine silver edition.

## Britannia

2021 ONE OUNCE  
SILVER BULLION COIN

For more than 1,100 years, The Royal Mint has innovated to create coins that are both beautiful and secure. In 2021, Britannia, the symbol of Britain, leads the way to redefine security in the bullion market, and embodies The Royal Mint's drive for the very best in design and security. This latest evolution of the icon takes Philip Nathan's acclaimed interpretation and adds four groundbreaking security features to create the most visually secure coin in the world. These additions both decorate and protect the coin, just as the micro-text that borders the design states – 'DECUS ET TUTAMEN', which translates as 'AN ORNAMENT AND A SAFEGUARD'. In the lower left-hand of the design, below Britannia's flowing gown, is a trident to represent her naval history. As the viewer changes their perspective this trident becomes a padlock, emphasising the coin's secure nature. Surface animation behind Britannia reflects the movement of waves, and fine details like the Union flag on Britannia's shield have been highlighted by tincture lines.

This is the only silver coin to carry the new security details but the new features are also available on the one ounce, half-ounce, quarter-ounce and tenth-ounce fine gold editions of the coin.

### KEY FEATURES

- Four advanced features take visual security to the next level
- A latent image changes from a padlock to Britannia's famous trident
- Surface animation brings the background of sparkling waves to life
- The micro-text provides both decoration and protection – 'an ornament and a safeguard'
- Britannia's shield bears the Union flag accented with tincture lines
