

2015 1-OUNCE 99.95% PURE PALLADIUM MAPLE LEAF BULLION COIN WITH UNIQUE SECURITY FEATURES

DIVERSIFY YOUR PRECIOUS METAL PORTFOLIO

Discovered in 1803, stunning silver-white palladium is more abundant than gold. This one-ounce 99.95% pure Palladium Maple Leaf (PdML) bullion coin makes a distinctive addition to your portfolio.

This coin's weight, content, and purity are guaranteed by the Government of Canada.

All 1-ounce 99.95% pure PdML coins produced for 2015 and beyond will have two unique features for enhanced security.

ENHANCED SECURITY

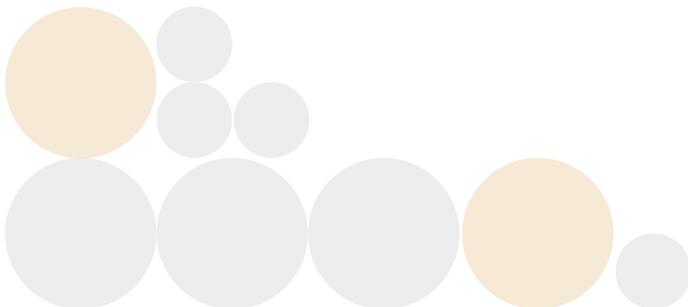

New in 2015, replacing the bullion finish on earlier coins, the radial lines in the new 2015 PdML's field have been precisely machined to within micrometres on the master tooling to ensure reproducibility from die to die and coin to coin. The uniqueness of the line width and pitch gives this coin a characteristic look, and creates a light diffracting pattern that is specific to this coin. Combined with a visual security feature—a textured maple leaf micro engraved with laser technology on a small area of the reverse side, with the numeral "15" denoting the coin's year of issue—this coin represents the cutting edge in coin security.
